EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: in claim 14, add a period at end of the claim.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a method to form a deep trench capacitor wherein the trench comprises a collar on the interior walls of the upper region and wherein HSG is deposited on the exposed interior walls of the lower region in the trench, wherein the HSG is first oxidized and then removed. The prior art teaches forming trench capacitors. (US 6,455,369 B1) The prior art teaches forming collar regions. (US 6,455,369 B1) The prior art teaches using HSG and oxidizing it without removing it. (US 6,159,874 and US Publication Number 2004/0079979 A1) The prior art teaches using HSG on a nitride layer that covers the walls of the trench, and then oxidizing the HSG and then removing it. (US 6,559,002 B1 and US 6,559,005 B2). While these teachings are found in the prior art, there does not seem to be any direct teaching or motivation to modify the prior art to form HSG directly on the exposed walls of the inside trench, and apply the oxidation and then removal process while having a collar on the upper region. Thus, absent hindsight, one with ordinary skill in the specific art would not arrive at the claimed invention of the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
